COLLEGE OF INFORMATION TECHNOLOGY AND COMPUTING

Data Science Department

SYLLABUS

Course Title: Object-Oriented Programming

Course Code: DS212

Credits: **3 units (2 hours Lecture, 3 hours Laboratory)**

USTP Vision

A nationally - recognized Science and Technology University providing the vital link between education and the economy.

USTP Mission

- Bring the world of work (industry) into the actual higher education and training of students;
- Offer entrepreneurs the opportunity to maximize their business potentials through a gamut of services from product conceptualization to commercialization;
- Contribute significantly to the national development goals of food security and energy sufficiency through Technology solutions

Year & Semester: Second Year, 1st Semester AY 2026-2027

Class Schedule: (LAB & LEC)

DS2A: M 7:00 AM - 10:00 AM | Th 9:00 AM - 11:00 AM

DS2B: M 1:00 PM - 4:00 PM | Th 11:00 AM - 1:00 PM

DS2C: T 10:00 AM - 1:00 PM | F 9:00 AM - 11:00 AM

Building/Room #: See approved PRISMS classroom assignment

Instructors:

DS2A - JHUN BRIAN M. ANDAM | jhunbrian.andam@ustp.edu.ph

DS2B - JHUN BRIAN M. ANDAM | jhunbrian.andam@ustp.edu.ph

DS2C - JHUN BRIAN M. ANDAM | jhunbrian.andam@ustp.edu.ph

Mobile/Contact No.: local 1228

Prerequisite(s): DS121, DS123

Co-requisite(s): **None**

Consultation Schedule: **WED | 1 PM to 5 PM**

Bldg./Rm. No.: **DS Office | 9-204**

Office Phone No./Local: **local 1228**

I. Course Description:

Object-Oriented Programming introduces programming from an object-oriented perspective and develops the competencies needed to design maintainable software for data science applications. The course covers classes and objects, abstraction, encapsulation, inheritance, polymorphism, special methods and operator overloading, exceptions, advanced class features, packaging, testing, distribution, documentation, and project organization. Through lectures and guided laboratory work, students design, implement, test, debug, package, and present object-oriented Python applications using modern software engineering and design principles.

Program Educational Objectives:

Three (3) to Five (5) years after graduation, BSDS graduates are:

PE01. Proficient in the Data Science field and able to engage constantly in big data analysis and professional advancement by pursuing a higher academic level and/or practicing quality improvement in their career or entrepreneurial endeavor;

PE02. Highly competent in generating new ideas and innovations in Data Science emphasizing on capturing, storing, retrieving and visualizing massive data; and

PE03. Leading data scientists who can effectively work on data sets to extract knowledge and identify patterns in order to predict trends; and contribute significantly to human development, socio-economic transformation, and national initiatives.

II. Course Outcomes(CO)

CO1: Explain and apply object-oriented programming fundamentals using classes, objects, abstraction, encapsulation, inheritance, polymorphism, and special methods.

CO2: Test, verify, debug, document, and organize object-oriented programs using exceptions, decorators, packages, and appropriate software engineering practices.

CO3: Design, implement, package, and present a tested object-oriented Python application that addresses a defined real-world problem.

Program Outcomes (PO)

a	b	c	d	e	f	g	h	i	j	k	l	m	n
I	I	E	E	E		I	I		I		I	I	
I	E	E	E	E	I	E	E	I	E		I	E	
I	E	E	E	E	E	E	D	D	D	E	I	E	I

III. Course Outline:

Allotted Time	Course Outcomes (CO)	Intended Learning Outcomes (ILO)	Topic(s)	Suggested Readings	Teaching-Learning Activities	Assessment Tasks/Tools	Grading Criteria	Remarks
5 HRs W1 (August 10-15, 2026)	CO1	Explain course expectations, fundamental object-oriented concepts, and the role of OOP in software development and data science.	COURSE ORIENTATION AND INTRODUCTION TO OOP - University Vision and Mission - CITC and Department orientation - Class policies, grading system, and syllabus	<i>USTP Student Handbook</i> <i>Course Syllabus Liang, Introduction to Programming Using Python</i>	Interactive orientation Lecture-discussion Diagnostic activity	Syllabus acknowledgement Diagnostic activity		Lecture/ Laboratory

Program Outcomes: Upon completion of the program, BSDS graduates are able to: a. Apply knowledge of computing science, and mathematics, and business management in solving complex data-driven problems; b. Use current standards and best practices within data-science and specific areas of mathematics (e.g. statistical analysis, optimization, machine learning, network analysis, experiment design, and algorithms, among others.) in solving complex data-driven problems and requirements; c. Analyze complex data-driven problems by applying analytical and quantitative reasoning; and identify the statistical and computing requirements appropriate to its solution; d. Extract, process and analyze data sets, including Big				4. History and principles of object-oriented programming 5. Python environment setup and responsible computing					
	5 HRs W2 (August 17-22, 2026)	CO1	Review Python syntax, variables, data types, operators, and expressions needed for object-oriented programming.	PYTHON PROGRAMMING REVIEW I - PYTHON SYNTAX AND CODING CONVENTIONS - VARIABLES, DATA TYPES, AND EXPRESSIONS - OPERATORS AND INPUT/OUTPUT - JUPYTER NOTEBOOK WORKFLOW	<i>Liang, Introduction to Programming Using Python</i> <i>Python official documentation</i>	Lecture-discussion Guided exercises SGTA	Python fundamentals exercise	See Grading System	Lecture/Laboratory
	5 HRs W3 (August 24-29, 2026)	CO1	Construct programs using conditional statements, loops, functions, and basic modules.	PYTHON PROGRAMMING REVIEW II - CONDITIONAL STATEMENTS AND BOOLEAN LOGIC - FOR AND WHILE LOOPS - FUNCTIONS, PARAMETERS, AND RETURN VALUES - MODULES AND REUSABLE CODE	<i>Liang, Introduction to Programming Using Python</i> <i>Downey, Think Python</i>	Lecture-demonstration Code-along Hands-on laboratory	Practical Workshop 1: Python Review	See Grading System	Lecture/Laboratory

Datasets too large for traditional data processing techniques; e. Design, implement and evaluate different predictive models, techniques, processes, components, or programs to meet desired needs and requirements under various constraints; f. Integrate effectively the big data analytics solutions into government sectors such as transportation, public health and safety, environmental issues as well as issues in the corporate and non-profit organizations; g. Create, select, adapt and apply appropriate techniques, resources, mathematical or statistical models, machine/deep learning and other modern tools to complex data science activities; h. Utilize data science and its technologies as strategies in marketing/branding of potential entrepreneurial ventures;	5 HRs W4 (August 31-September 5, 2026)	CO1	Define classes, instantiate objects, and use constructors, attributes, methods, and standard libraries.	OBJECTS AND CLASSES - CLASSES, OBJECTS, AND INSTANCES - CONSTRUCTORS, ATTRIBUTES, AND METHODS - STANDARD LIBRARIES AND PACKAGES	Downey, Think Python Python official documentation	Lecture-demonstration Coding drills SGTA	Quiz 1 Class-and-object exercises	See Grading System	Lecture/Laboratory
	5 HRs W5 (September 7-12, 2026)	CO1	Apply abstraction and encapsulation to design cohesive classes with controlled access to state and behavior.	ABSTRACTION AND ENCAPSULATION - ABSTRACTION AND INTERFACE DESIGN - ENCAPSULATION AND INFORMATION HIDING - PROPERTIES, ACCESS CONVENTIONS, AND VALIDATION	Liang, Introduction to Programming Using Python Python official documentation	Lecture-discussion Guided laboratory SGTA	Practical Workshop 2: Encapsulation	See Grading System	Lecture/Laboratory
	5 HRs W6 (September 14-19, 2026)	CO2	Implement inheritance hierarchies, method overriding, and super() to reuse and extend class behavior.	INHERITANCE AND METHOD OVERRIDING - BASE AND DERIVED CLASSES - METHOD OVERRIDING AND SUPER() - MULTIPLE INHERITANCE AND METHOD RESOLUTION	Downey, Think Python Python official documentation	Lecture-demonstration Inheritance design exercises Hands-on laboratory	Quiz 2 Inheritance laboratory task	See Grading System	Lecture/Laboratory

Intelligence for continual development as a computing professional; m. Participate in generation of new knowledge, or in research and development projects with the end view of contributing to local and national economy; and n. Preserve and promote “Filipino historical and cultural heritage”.	5 HRs W10 (October 12-17, 2026)	CO3	Implement special methods and operator overloading to define meaningful object behavior.	SPECIAL METHODS AND OPERATOR OVERLOADING 1. OBJECT REPRESENTATION AND LIFECYCLE METHODS 2. COMPARISON AND ARITHMETIC SPECIAL METHODS 3. OPERATOR OVERLOADING AND APPROPRIATE USE	<i>Python Data Model documentation Downey, Think Python Python official documentation</i>	Lecture-demonstration Operator-overloading laboratory SGTA	Portfolio 2A: Special Methods Exercise	See Grading System	Lecture/Laboratory
	5 HRs W11 (October 19-24, 2026)	CO3	Design robust classes using exception handling, custom exceptions, and defensive programming.	EXCEPTION HANDLING IN OOP 1. TRY, EXCEPT, ELSE, AND FINALLY 2. RAISING AND DEFINING CUSTOM EXCEPTIONS 3. DEFENSIVE PROGRAMMING AND VALIDATION	<i>Python Data Model documentation Python official documentation</i>	Lecture-demonstration Exception-handling laboratory Peer checking	Quiz 3 Custom-exception problem set	See Grading System	Lecture/Laboratory
	5 HRs W12 (October 26-31, 2026)	CO3	Use decorators, class methods, static methods, and metaclasses in appropriate advanced OOP contexts.	ADVANCED OOP CONCEPTS 1. Function and class decorators 2. Class methods and static methods 3. Metaclasses and controlled class creation	<i>Python Data Model documentation Downey, Think Python Python official documentation</i>	Lecture-demonstration Advanced OOP laboratory SGTA	Practical Workshop 3: Decorators and Metaclasses	See Grading System	Lecture/Laboratory

			project design.	3. Project structure, roles, and milestones					
	5 HRs W16 (November 23-28, 2026)	CO3	Implement the OOP project using appropriate class relationships, exception handling, testing, and version control.	OOP PROJECT IMPLEMENTATION 1. Class implementation and collaboration 2. Exception handling and validation 3. Testing, debugging, and version control	<i>Python Data Model documentation</i> <i>Python Packaging User Guide</i>	Lecture-demonstration Project implementation laboratory SGTA	Integrated OOP project implementation	See Grading System	Project Development
	5 HRs W17 (November 30-December 5, 2026)	CO1, CO2, CO3	Refine, document, package, and present the completed object-oriented application.	OOP PROJECT COMPLETION AND PRESENTATION 1. Integration, testing, and debugging 2. Documentation, packaging, and reproducibility 3. Presentation and demonstration	<i>Course project guide</i> <i>Python official and Python Packaging documentation</i> <i>Project rubric</i>	Project laboratory Consultation Code review Peer feedback Rehearsal	Final OOP project implementation Code review Presentation rehearsal	See Grading System	Project Development
	5 HRs W18 (December 7-12, 2026)	FINAL EXAMINATION WEEK							

IV. Course Requirements:

1. Class attendance and participation:

Attendance and Participation in Co-Curricular Activities

- Students are expected to attend and actively participate in relevant webinars, training, and competitions as part of their academic engagement. Participation in such activities will be awarded corresponding points, which shall be determined and arranged by the faculty and reflected in the overall grading system.

Refer to the current USTP Student Handbook for attendance and participation policies.

2. Course readings/materials:

(a) Books, E-books

- Allen B. Downey, Think Python.
- Object-Oriented Programming: Core Concepts in Computer Science. 3G E-Learning.
- Y. Daniel Liang, Introduction to Programming Using Python.
- Donald Norris, Python for Microcontrollers: Getting Started with MicroPython.
- Current official documentation for Python, the Python Data Model, Python Packaging, and pytest.
- Joyce Farrell. (2018). Microsoft Visual C# : an introduction to object-oriented programming/ [Book/Paperback]. Clifton Park, NY: Cengage Learning.
- Nell Dale, Daniel T. Joyce, Chip Weems. (2018). Object-oriented data structures using Java/[Book/ Hardcover]. Burlington, Massachusetts : Jones & Bartlett Learning.
- Object.oriented_programming. New York: 3G elearning, 2018,
- Donald R. Franceschetti, ed. Ipswich. (2018). <https://go.gale.com/ps/i.do?p=GVRL&sw=w&u=phustp&v=2.1&it=etoc&id=GALE%7C7>
- Neha Kaul. (2018). Object.oriented_programming with.java.Canada : Arcler Press.
- Programming in java/[Book/ Hardcover]. New Delhi: Random Publications, 2017.
- J. F.DiMarzio. (2017). <https://onlinelibrary.wiley.com/doi/book/10.1002/9781119419334>. John Wiley & Sons,
- Approved institutional instructional materials and laboratory guides.

(b) Supplies needed (desktop/laptop computer, stable Internet connection, Python development environment, and version-control tools)

3. Assignments, Assessment, and Evaluation

(a) Policy concerning homework

- Homework and laboratory outputs shall be submitted on the scheduled dates. Late submissions follow the Student Handbook and documented course arrangements.
- Required laboratory exercises, quizzes, portfolios, and project milestones shall be completed throughout the semester.

(b) Policy concerning make-up exams

- Make-up examinations are granted only for valid, documented reasons and are scheduled in accordance with University policy.

(c) Policy concerning special quizzes

UNIVERSITY OF SCIENCE AND TECHNOLOGY OF SOUTHERN PHILIPPINES

Alubijid | Balubal | Cagayan de Oro | Claveria | Jasaan | Oroquieta | Panaon | Villanueva

Document Code No.		
FM-USTP-ACAD-01		
Rev. No.	Effective Date	Page No.
00	03.16.26	10 of 13

- Special quizzes are granted only to students who present valid reasons and appropriate supporting documents for their absence.
 - The special quiz shall be scheduled according to the instructor’s documented arrangement and University policy.
- (d) Preliminary information on term papers or projects, with due dates
- Late project submissions shall be handled in accordance with documented course policies and approved arrangements.
- (e) List of requirements that will impact the final grade
- OOP programming workshops, quizzes, midterm and final examinations, laboratory portfolios, packaged application outputs, and the final object-oriented project.
- (g) GRADING POLICY
- (Passing Percentage is 70%)
- Ex. In a 10-item quiz, obtaining 7 points would be equivalent to a passing score.
- (h) Guidelines on the Ethical Use of AI Tools
- Students may use AI-powered tools (e.g., ChatGPT, Grammarly, or statistical software with AI features) only as assistive technologies, such as for brainstorming ideas, improving writing clarity, or supporting data analysis.
 - Any use of AI must be properly disclosed, either in the references or through a brief AI Acknowledgement (e.g., “ChatGPT was used to rephrase draft text and suggest structure; the final work is the student’s own.”).
 - Students are not permitted to use AI to generate entire assignments, research papers, or exam answers, as this constitutes academic dishonesty.
 - Students remain fully responsible for verifying the accuracy, originality, and ethical integrity of any AI-assisted output.
 - Any misuse of AI—including plagiarism, data fabrication, or over-reliance without critical evaluation—will be treated as a violation of academic integrity.

Grading System

Lecture Grade (67%)	
Performance Item/Criteria	%
Class Performance Item	10%
Quizzes (All quizzes, prelim and pre-final exams)	40%
Major Exams (i.e, Midterm and Final Exams)	30%
Performance Innovative Task / Project	20%
TOTAL	100%
Laboratory Grade (33%)

Performance Item/Criteria	%
Laboratory Exercises/Reports	30%
Laboratory Major Exam	40%
Hands on Exercises	30%
TOTAL	100%
Term/Periodic Grade = 67% Lecture Grade + 33% Laboratory Grade	
<i>Options: FINAL GRADE (FG) = 1/3 Midterm Grade (MTG)+ 2/3 Final Term Grade (FTG)</i>	
FINAL GRADE (FG) = 1/2 Midterm Grade (MTG)+ 1/2 Final Term Grade (FTG)	

- The use of **USTeP (University of Science and Technology E-learning Portal)** as the official Learning Management System
To distribute course materials, to communicate and collaborate online, to post grades, to submit assignments, and to give you online quizzes and surveys.
- Rubrics Used for Assessment
 - Laboratory/Portfolio:**

Criteria	Unsatisfactory-Beginning	Developing	Accomplished	Exemplary	Total
Technical Correctness and Completeness	0-7 points	8-11 points	12-16 points	17-20 points	/20
	The program is incomplete or fails to run; major requirements are missing or technically incorrect.	The program runs only partially and contains substantial syntax, logic, data-handling, or output errors.	The program meets most requirements and produces generally correct results, with only minor technical errors.	The program fully meets the requirements, runs correctly, and demonstrates accurate and efficient implementation.	
OOP Design, Code Organization and Reproducibility	0-4 points	5-7 points	8-11 points	12-15 points	/15
	Classes and modules are poorly organized, undocumented, and cannot be reproduced or maintained reliably.	Some class organization and documentation are evident, but responsibilities, relationships, or execution remain difficult to follow.	Classes, modules, dependencies, and outputs are generally organized and documented; the application is reproducible with minor clarification.	Classes, modules, dependencies, tests, and outputs are consistently organized, documented, maintainable, and fully reproducible.	
OOP Application and Communication	0-4 points	5-7 points	8-11 points	12-15 points	/15

UNIVERSITY OF SCIENCE AND TECHNOLOGY OF SOUTHERN PHILIPPINES

00	03.16.26	12 of 13

	The application does not demonstrate meaningful OOP use, and its design and behavior are not explained clearly.	OOP principles are applied inconsistently, and the design explanation or demonstration contains notable gaps.	OOP principles are applied appropriately and the application is explained and demonstrated clearly, with only minor omissions.	OOP principles are applied purposefully, justified by the design, and communicated through a clear and professional demonstration.	
Timeliness	Deduct 11 points-overall failing	Deduct 6-10 points	Deduct 1-5 points	0 points deducted	/-
	The laboratory or portfolio output is submitted 2-3 days (49-72 hours) after the deadline.	The laboratory or portfolio output is submitted 1-2 days (25-48 hours) after the deadline.	The laboratory or portfolio output is submitted within 1 day (24 hours) after the deadline.	The laboratory or portfolio output is submitted on or before the deadline.	
TOTAL POINTS (sum of 4 Criteria)					/50

● Final Project:

CATEGORY	5	4	2	1
Organization	Information is very organized in a well-constructed paragraph or paragraphs.	Information is organized in a well-constructed paragraph or paragraphs.	Information is organized, but paragraph(s) are not well-constructed.	The information appears to be disorganized.
Amount of Information	All topics are addressed and all questions answered with at least 2 sentences about each.	All topics are addressed and most questions answered with at least 2 sentences about each.	All topics are addressed, and most questions answered with 1 sentence about each.	One or more topics were not addressed.
Quality of Information	Information clearly relates to the topic. It includes details and/or examples.	Information relates to the topic. It provides few supporting details and/or examples.	Information partially relates to the topic. No details and/or examples are given.	Information has little or nothing to do with the topic.
Application of Learning	Information presented shows a clear understanding and application of the Professional Development Topic.	Information presented shows understanding and application of the Professional Development Topic.	Information presented shows a partial understanding and application of the Professional Development Topic.	Information presented shows little or no understanding and application of the Professional Development Topic.
Mechanics	No grammatical, spelling or punctuation errors.	Almost no grammatical, spelling or punctuation errors	A few grammatical, spelling, or punctuation errors.	Many grammatical, spelling, or punctuation errors

● Object-Oriented Application Project and Presentation

PRESENCE

- body language & eye contact
- contact with the public
- poise
- physical organization

LANGUAGE SKILLS

- correct usage
- appropriate vocabulary and grammar
- understandable (rhythm, intonation, accent)
- spoken loud enough to hear easily

ORGANIZATION

- clear objectives
- logical structure
- signposting

MASTERY OF THE SUBJECT

- pertinence
- depth of commentary
- spoken, not read
- able to answer questions

VISUAL AIDS

- transparencies, slides
- handouts
- audio, video, etc.

OVERALL IMPRESSION

- very interesting / very boring
- pleasant / unpleasant to listen to
- very good / poor communication
